THE WORLD-ORIENTED KING MACHINE

Excellent History & Realize Dreams

About Us

Zhangjiagang King Machine Co.,Ltd is located at the new port city—Zhangjiagang. Our company has fixed assets of over RMB 30million and covers an area of 20000m²,we own a professional design and research team. We are a leading enterprise in making full set water,juice,carbonated drink,wine,beer production line,gathering development, designing, production, technology service and marketing.

Our company complies with ISO9001:2000 international quality management system. Also carries out the modern enterprises management system, to executes quality control during the processes of producing. Wins customers' recognition by the high quality products and services.

According to Chinese situation, we developed full-set equipments for liquid and high automation advanced technology. Automation level is also advanced .Now our customers are all over more than 30provinces in China,and also in America,Russia, Africa,South America.....

We will carry on trying our best to meet the demands of our customers continually and seek for development together with our customers.

THE WORLD-ORIENTED KING MACHINE

Excellent History & Realize Dreams

Why us?

1. Trade assurance
on-time shipment
pre-shipment quality inspection
2. Best Price with factory quality standard
3. Professional english speaking commissioning team
4. Sales team with professional knowledge of products and well english communication skill
5. WhatsApp Viber Skype reachable at anytime

Smiling, Is the most beautiful language in our working!

No matter what difficulties happened in our life, We will use our smile and sincerity to face, and affect all people around us. Trust, sincerity and confidence is the key to make your success. It is also the most beautiful gift to our partners.

Keep smiling in every moment in life.

Water Treatment System

Silica sand filter:

It can remove the suspended solids and gluten particles in the water, thus reduce the turbidity of water.

Active carbon filter:

It can remove the pigment, smell and a large number of biological organisms in the water.

Sodium ion exchanger:

It can remove calcium and magnesium ions in the water, so as to soften the water.

Precision filter:

It can ensure that the granularity of the water into reverse osmosis membrane is less than 0.1 μm .

Reverse Osmosis:

The Reverse Osmosis Device is an equipment to purify the saline water with the action of pressure difference of semi-permeable membrane. It is called reverse osmosis, as it is counter to natural penetration direction. Different materials have different osmotic pressures.

The reverse osmosis can remove more than 97% of the soluble salt and above 99% of the colloid, microorganism, particles and organic materials, becoming the best first-choice equipment in the engineering of modern purified

water, highly purified water and space water (super-purified water). The most highlighted features are low energy consumption, no pollution, simple technique, high-quality water and convenient operation and maintenance.

UV sterilizer:

It uses the UV to kill some bacteria that may also pass through the reverse osmosis system.

Ozone sterilizer:

Some bacteria may not be killed by the UV, the sterilizer uses ozone to kill those bacteria.

Hollow-fibre Ultrafilter This ultrafilter adopts dissymmetrical semipermeable film which is made from macromolecule material with special process. The raw liquid flows under pressure, inside or outside the film. The macromolecule substance and colloid particles in the raw liquid are clogged at the film surface and are brought away by circulating raw liquid. Then the raw liquid becomes inspissated, furthermore, the substance in liquid is separated, concentrated.

According to customer's water source analysis report and the final water standard required, we will suggest customer to choose the suitable water treatment plants.

CGF Series Water Filling Machine

washing filling capping 3-In-1

Product Application

The machine is mainly used for washing, filling sealing Non-Aerated carbon dioxide drink such as mineral water, pure water, non-gas wine drink and so on, The machine design is shorten the time for the drink material contact with outside, Increase the sanitation condition throughout economy benefit.

Capability Character

It adopts hanging type conveying-bottle structure to make changing bottle model more convenient, faster and easier. The main machine adopts advanced PLC control technology. The key electric elements adopt international famous products.

Technical Parameter

Model:	CGF14-12-4	CGF16-16-5	CGF18-18-6	CGF24-24-8	CGF32-32-10	CGF40-40-12	CGF50-50-12
Capacity(500/ml/bottle/h)	3000-4000	4000~6000	6000~8000	8000-12000	13000-15000	16000-18000	20000-24000

Washing, Filling And Sealing Production Line For Pure Water, Mineral Water, Fruit Juice, Spirit,etc.

Usage Characteristic:

The production line includes ZPC auto washer, GFP auto filler, YQX auto capper, SC conveyor etc. The key parts for washing, filling and sealing are made of high quality stainless steel, with the features of advanced technology, completed system, reliable performance, easy operation, etc.

Technical Parameter

Model:	ZPC-12 GFP-12 YQX-3	ZPC-18 GFP-16 YQX-4	ZPC-24 GFP-24 YQX-6
Production b/h	1000-2000	2000-4000	3000-8000

Motor Power kw	3.05	4.07	4.82

3-10L Bottle Washing Filling Capping Linear Line

This line is mainly used for liquid filling, which concentrates disinfection rinsing, filling, capping together, with features of moderate production capacity, simple structure, and easy operation.

Technical Parameter

Model:	XGF4-4-1	XGF6-6-1	XGF8-8-3
Capacity	700bph 5L	1000bph 5L	1200bph 5L
Washing head	4	6	8
Filling head	4	6	8
Capping head	1	1	3
Power KW	2.5	4.5	5.5
Dimension	2800*1100*1800	3500*1100*1800	4200*1100*1800

3-10L Bottle Washing-filling-capping 3-in-1

This series machine is combined by Bottle Rinsing, filling and capping. It's Mainly used for 3-10L bottled Water, Alcohol drinks, oil etc. non-carbonated drinks. It adopts gravity filling technology, automatic cap pickup, magnetic force capping, and the capping force adjustable. It is advanced technology in China.

Technical Parameter

Model	CGF 12/12/1	CGF 15/15/5	CGF 24/24/8
Production Capacity(500ml)(b/h)	1000-1500	1500-2000	2500-3000
Total Power(KW)	2.2	3	4

Full Automatic Barrel Production Line

This filling line specially for 3-5 gallons barreled drinking water, with type QGF-100, QGF-240, QGF-300, QGF-450, QGF-600, QGF-900, QGF-1200. It integrates bottle washing, filling and capping into one unit. In order to achieve the purpose of washing and sterilizing. The washing machine uses multi-washing liquid spray and thimerosal spray. This thimerosal can be used circularly. The capping machine can cap barrel automatically. This line equips with water spraying device in order to ensure those caps sterile and clean. It also can automatically carry out barrel, washing, sterilizing, filling, capping, counting and products discharging, with complete function, modern design and high degree of automation. It is a new kind of barreled water auto-producing line, which integrates mechanism, electricity and pneumatics technologies together.

DCGF Series Carbonated Drink 3-in-1 Filling Machine

Usage Characteristic:

The series equipment is used in production gas containing water of PET polyester bottle-packing carbonated beverage, such as Coca cola, Pepsi-cola, Spirit drink etc. It carries out washing bottle, filling and capping on one machine. The whole machine designing is reasonable. The appearance is beautiful and the maintenance is convenient. It adopts bottle handing technology to make changing bottle more convenient, faster and easier. The main machine adopts advanced PLC control ,touch screen and no-bottle,no-cap system The key electric elements are from famous international brand.

Juice/Tea Hot Filling Machine

Washing Filling Capping 3-in-1

Hot Filling Products

Energy Drink

Tea

Juice

RCGF series three-in-one set of machine is mainly used in the beverage filling process. The machine combines washing, filling and capping with complete automation, suitable for filling juice and tea beverage. With temperature controller, it can also conduct thermal filling. It is used for all kinds of bottles. The bottle neck hanging technology makes the process of changing bottles easily by only adapting the height of conveyor chain. The filling process adopts hot filling technology with water-supplying system under constant pressure, which makes filling process faster and more stable. Compared with other equipment of the same kind, this machine with a better quality and thus enjoys a high ratio of function against price. The hot filling type machine works with balanced tank and vacuum system.

Technical Parameter

Juice Beverage

Auxiliary Machines

Plate UHT sterilizer

Mainly used for heating and sterilizing in juice, tea beverage, fresh milk, and alcohol and other heat sensitivity liquid, also keeping warm and cooling, with the sterilization temperature at 85-135°C.
Capacity: 3T/H-15T/H.

Pipe UHT sterilizer

This sterilizer is mainly used for sterilization in high viscosity products with fiber and bigger flesh, and other products with high acidity, such as fruit juice, jam, coffee beverage, sterilized milk. Sterilization temperature is at 80°C-140°C.
Capacity: 3T/H-15T/H.

High pressure homogenizer

Used for ultrafine grinding material, and forming solid and liquid dispersoid.
Capacity: 1T/H-10T/H

Vacuum Deaerating Machine

The deaerator is one of the necessary equipment in fruit juice or fruit tea production line. It is mainly used for deaerating the homogenized juice under vacuum condition and to prevent the juice from being oxidized and then to prolong the storing period of the juice.

UHT instantaneous sterilizer

This equipment is mainly used for sterilization for fluid material, such as fresh milk, juice, beverage, alcohol, soybean milk and so on. Capacity: 1T/H-10T/H

Irregular Plastic Cap Capping Machine

Crown Cap Sealing Machine

Plastic Cap Capping Machine

Aluminum Cap Sealing Machine

Wine Glass Bottle Filling Machine

Technical Features:

- Filling valve adopts high precision mechanical filling valve, with the character of no bottle no vacuum pumping.
- Open Gear combined gear box transmission, with on-off device. Frequency conversion velocity modulation device extends the speed modulating scope.
- This machine has self oil lubrication device so that the lubrication points could be lubricated regularly in time. The machine is of high efficiency, low noise and long life.
- Centering guide is of double guide bar type, with the function of pre-covering.
- Wine jar and capping head are driven by manual, also can be driven by electricity to fit different sizes of bottles.
- The material height in the tank is controlled by electric probe to assure the precise liquid level.

Technical Parameter

Model:	BCGF16-12-6	BCGF18-18-6	BCGF24-24-8	BCGF32-32-10

Filling heads	12	18	24	32
Capping heads	6	6	8	10
Production Capacity(b/h)	3000-4000	5000-6000	6000-8000	8000-10000
Power of main motor(kw)	3	3.8	5.5	7.5

Beer Filling Capping 2-in-1 Unit Machine

Technical Features:

It is used for filling and sealing various kind of glass bottle with crown type bottle cap for beer filling production line.

The machine adopts advanced international technology, It's design scientific and reasonable, appearance is beautiful, operation and maintenance is convenient, and it's high degree of automatization, so it is the good machine for middle and small beer manufacturer.

Technical Parameter

Model:	BGF12/6	BGF18/6	BGF24/8	BGF32/10
Production Capacity(500ml)(b/h)	1000-1200	2000-3000	4000-5000	6000-8000
Total Power(kw)	1.5	1.5	3.75	5.6

Automatic Piston/Flowmeter Filling Machine

This type machine is suitable for filling viscous, inviscid and corrosive liquid. It's widely applied in plant oil, chemical liquid, and daily chemical industry. It adopts linear type filling, electromechanical & instrumental integration controlling. It's simple and rapid for changing the varieties with unique design and superior capability. Its appearance accords with the international machinery concept.

Germany SIEMENS PLC and touch screen control make it intelligentize protection function. Vacuum anti-dropping device ensures no leaking situation in production. Electronic adjusting for volume system, frequency control and photoelectric detecting system (Germany TURCK brand) are applied in this machine.

Technical Parameter

Parameter	Unit	SNYG Series				
No. of heads	Pcs	12	10	8	6	4

Gas pressure	0.55-0.8Mpa	0.55-0.8Mpa	0.55-0.8Mpa
Air Consumption	0.3m ³ /min	0.3m ³ /min	0.3m ³ /min

Liquid Bag Filling Sealing Machines

This series is widely used in the film packing of milk, soy milk, all kinds of drinks, soy, vinegar, yellow wine etc. All packing procedures: ultraviolet ray sterilization, molding of bags, print of dates, filling with fixed quantity, sealing and cutting and numeration. All components are made of stainless steels and are designed to meet state hygienic standard. A and B model adopt single-layer polyethylene film while C model employs composite films. Among them, B model is twin type designed so it can fill two types of liquid of different colors and flavor in one package; C model are categorized as middle sealing, side sealing and photo-electric detection.

Technical Parameter

Model:	SJY-1000A	SJY-1000B	SJY-1000C
Speeding of Production	1500-2100 bags/hour	1500bags/hour	1000-1800bags/hour

Overall Dimensions	850×800×1800mm	950×850×1900mm	1050×850×1850mm

Granular Packing Machine

The series feeding is used with PLC control, featuring accuracy and stability, suitable to the fields of food, pharmacy, pesticide and chemical industry such as condiments, milk powder, medicine powder and a variety of powders from 100-300 mesh.

Technical Parameter

Model	KM-Y2
Voltage	220V50Hz(380V50Hz220V60Hz)
Power	1800W
Air Pressure	0.6MPa
Bag Size	180×120mm
Speed	30-80b/m
Precision	1-100MI(±1.20%)
Overall size	810×940×1750mm
Weight	335kgs

Can Filling and Capping Linear Line

This combined machine is used for isobar filling and capping of beer and air-contained beverage. It adopts the most advanced mechanical, electrical, pneumatic control technique in the world. It has such advantages as stable filling, fast speed, control of liquid surface, reliable sealing, frequency modulation speed adjustment, little loss of material, etc. We can install remote control system according to requirements of customer, it is priority and ideal facility for medium-size beer plant and beverage plant.

Advantages

1. The filling amount is rather average, the adjustment is convenient.
2. Main frame adopts sus304, liquid contact parts adopts sus316.
3. It adopts special filling valve which makes washing and cleaning convenient.

Technical Parameter

Model	CGJ-50	DGC-12/16	YLG-40

Can Filling and Sealing Machine for Carbonated Drink

The machine is advanced filling and capping equipment, it's designed on the basis of absorbing domestic and foreign advanced technology. It is mainly used in filling and capping carbonated beverages as soft drinks, cola, sparkling wine, etc. It has such advantages as advanced construction, stable working, convenient operation and repair & maintenance, transducer control as well as high production efficiency. It is the ideal equipment for mid-scale & small-scale beverage factory.

Technical Parameter

Model	GDF12-1	GDF18-6	GDF24-6
Production capacity(b/h)	1000-2000	3000-6000	4000-9000

Weight (kg)	1800	2500	3000

LP Series Bottle Unscrambler

The machine is used in ordering disordered polyester bottles. The disordered bottles are carried into the storing bottle section of the ordering bottle machine. With the help of the pushing force of the rotating disk, the bottles enter their position. With the function of the turning bottle device and the air-flow, the bottles are ordered into bottle mouth-up-position and are carried into the next process with the air-transferring type conveying bottle system. The machine adopts PLC computer-control, frequency control to adjust its production capacity. It has a screener to automatically screen out non-standard bottles.

Technical Parameter

Model	LP-16	LP-18	LP-21

Belt Chain Conveyor System

Specification:

1. Conveyor Height: 1050mm
2. Side panel: 304 stainless steel sheet, thickness is 2mm
3. Power: HANGZHOU JIE Brand 0.75KW
4. Supporting leg: 304 stainless steel
5. Trunking and cover: 304 stainless steel
6. Lubricant water conservation tank: 304 stainless steel
7. Chain plate: Domestic high-quality plastic chain plate, polyoxymethylene (POM)
8. Bearing housing: 304 stainless steel cage

Empty Bottle Air Conveyor

Technical parameter

1. Model of fan: DF-9; Power fan: 2.2 KW/Unit
2. Air conveyor frame: 304 SUS 2B plate 1.5mm
3. Inner flange: 304 SUS 2mm
4. Bottle block frame: 304 SUS 2B plate 2mm
5. Bottle neck holding bar: 7.5million Ultrahigh molecular polyethylene
6. Bottle blocker: Ultra high molecular green color *202 round pipe
7. Flang gripper: Ultra high molecular 304
8. Pre-filter G4 Camfil Swedish
9. Breaker and contactor: Schneider French

Auto-sleeve Shrinking

Label Machine

Steam generator

Steam Shrinking Tunnel

Usage Characteristic:

This machine adopts international advanced technology; cover the circle label on the PET bottle. And then hot shrinking to fix on the position which bottle body designated.

This machine's structure is compact, and suitable for the production line of different direction and different height. The machinery part adopts combination designing of modularization, and makes the machine reasonable. The height adjustment adopts motor fluctuating; it is convenient to replace the material. The special cutter head designing, make the film-rolling cut more exactly and reliably.

Double Head Auto-shrink Sleeve Label Machine

Technical Parameter

Model	SPC-150B	SPC-250B
Input power	1.5KW	3.0KW
Input Voltage	Φ3380/220VAC	Φ3380/220VAC
Production Efficiency	150Bottle/min	250Bottle/min
Size of Host Machine	2100L×850KW×2000H	2100L×850KW×2000H
Applicable Diameter of Bottle Body	Φ28mm-Φ125mm	Φ28mm-Φ125mm
Applicable Thickness of Label	30mm-250mm	30mm-250mm
Applicable Length of Lable	0.03mm-0.13mm	0.03mm-0.13mm
Applicable Internal Diameter of Paper Tube	5" -10" (Adjustable)	5" -10" (Adjustable)

Automatic Self-adhesive Labeling Machine

Automatic Cold Glue Labeling Machine

WD-150A Automatic Non Tray Shrink-Wrapping Packing Machine

Applications:

The machine is developed especially for mineral water, beverage, wine, beer, product and so on infusion medicine bottle combination packaging, with stable function, and the packed articles tight and orderly. It can be handled as a single pushing machine when high speed demanded.

Technical Parameter

Model	WD-150A
Dimension of the equipment	L5050*W3300*H2100mm
The largest dimension of the wrappage	L600*W400*H350mm
Material of shrink film	PE
Thickness of shrink film	0.03-0.15mm
The highest temperature of the heat shrink furnace	160-260degree
The maximum production per minute	0-12 packages/min
Power	20KW
Actual Power	15Kw/hour
Weight	1.2T
Pressure of air	0.6-0.8Mpa

Linear type Automatic PE Film Shrink Wrapping Machine

Technical Parameter

Power	28KW	PE film	thickness: 0.03-0.10mm ,width : ≤600mm
Air consumption	25m³/H. ≥0.6MPa	Weight	1.5ton
Speed	20-25bag/minute.	Dimension	L12000×W1100×H2100mm
Bottle diameter	Φ60-90mm, height≤330mm	Wrappage max size	L2400×W650×H450mm

Semi Automatic PE Film Shrink Wrapping Machine

Technical Parameter

Model	BZJ-5038B
Max. packing dimension	L450×W270×H330mm
Min. packing dimension	L250×W60×H140mm
Power	220 ~ 240V, 50-60HZ, 1.6KW
Packing speed	0-8pcs/minute
Load of pushing board	20kg
Film thickness	0.03-0.25mm
Dimension	L1020×W830×H1980mm
Machine Weight	170kgs
Film Thickness	0.03-0.25mm

Full Automatic Blow Molding Machine(1800-5500bph)

Technical Parameter

Model	Item	KM-A2	KM-A4	KM-A6
Productivity	Depend on bottle design	1800-2000 PCS/H	3200-4000 PCS/H	4000-5500 PCS/H
Product type	Volume	0.1-2.0L	0.1-2.0L	≤1.5L
	Body diameter	≤100mm	≤100mm	≤90mm
	Height	≤310mm	≤310mm	≤310mm
	Neck diameter	38mm	38mm	28-30mm
Mould	Cavity	2	4	6
	Mold thickness	240mm	240mm	240mm
	Mold volume	260*240*370mm	510*240*360mm	640*240*360mm
	Electrical source power	380V/220V 50/60HZ 3Phase	380V/220V 50/60HZ 3Phase	380V/220V 50/60HZ 3Phase
Main machine Power	Rated Power	25kw	49kw	73kw
	Really use power	6.5kw	13kw	25kw
	HP air compressor	1.4m³/min 3.0MPa	2.0m³/min 3.0MPa	6.0m³/min 3.0MPa
Air system	LP air compressor	1.0m³/min 1.0MPa	1.6m³/min 1.0MPa	2.0m³/min 1.0MPa
	Air Tank	0.6m³ 3.0MPa	0.6m³ 3.0MPa	1.0m³ 3.0MPa

Four Cavities Blow Molding Machine

Technical Parameter

Model	KM-SA4
Number of Cavities	4 Cavity
Material	PET/PC/PP/PE
Clamping Force	300KN
Max Clamping Stroke	350mm
Bottom Moving Stroke	60mm
Max.Stretching stroke	380mm
Theoretical Output	200BPH
Max.area of mouldbase	750*420
Max.Mould Thickness	190mm
Space Between Tie Bars	670*340mm
